

BRAND BOOK

A practical identity and digital design system for the ProcureX industrial marketplace.

Where Industry Connects.

Version 1.0 | 2026

ProcureX at a glance

ProcureX is a modern industrial procurement network: trusted discovery, RFQs, quotations, supplier visibility and machinery commerce in one system.

CORE IDEA

Where Industry Connects.

Connect buyers to credible suppliers and make industrial procurement easier to start, compare and manage.

BRAND PROMISE

Less friction. More confidence.

Every touchpoint should reduce sourcing effort while increasing trust and visibility.

PRIMARY AUDIENCE

- Procurement and supply-chain teams
- Engineering, plant and maintenance teams
- Industrial suppliers and machinery sellers
- Pharma, food, packaging and laboratory sectors

THE BRAND SHOULD FEEL

TRUSTED

Verified, credible, professional

EFFICIENT

Fast paths to requirements and quotes

INDUSTRIAL

Purpose-built for B2B manufacturing

MODERN

Digital, clean and data-led

HUMAN

Helpful, direct, not bureaucratic

Positioning & brand story

The brand is strongest when it behaves like procurement infrastructure - not a generic classifieds site.

POSITIONING STATEMENT

ProcureX helps industrial buyers discover reliable suppliers, post requirements, compare quotations and source new or used equipment through a verified B2B marketplace.

MISSION

Make industrial sourcing simpler, more transparent and more connected.

- Reduce supplier discovery time
- Improve quotation quality
- Build trust through verification

VISION

Become the digital procurement network that connects industrial businesses across Pakistan and later regional markets.

- Buyer demand creates supplier opportunity
- Supplier quality creates buyer trust
- Data makes the network smarter

MARKET ROLE

ProcureX is the connector and workflow layer between industrial demand and supply.

- Supplier discovery
- RFQ and quotation exchange
- Industrial asset marketplace

Brand personality

Use these attributes to judge copy, interface decisions, visuals and sales materials.

PROFESSIONAL

not corporate-heavy

Clear specifications, evidence and structure.

CONFIDENT

not loud

Strong hierarchy and decisive calls to action.

HELPFUL

not chatty

Reduce buyer effort and explain the next step.

TECH-LED

not futuristic

Modern tools that solve real procurement problems.

INDUSTRIAL

not mechanical

Reflect manufacturing without looking old-fashioned.

PREMIUM

not luxurious

Quality, trust and discipline over decoration.

Logo system

The ProcureX wordmark combines a neutral, authoritative word with an energetic blue X that acts as the recognizable brand signal.

PRIMARY / LIGHT BACKGROUND

The wordmark 'ProcureX' is displayed in a bold, sans-serif font. The word 'Procure' is in black, and the 'X' is a vibrant blue with a 3D, ribbon-like structure.

REVERSED / DARK BACKGROUND

The wordmark 'ProcureX' is displayed in a bold, sans-serif font. The word 'Procure' is in white, and the 'X' is a vibrant blue with a 3D, ribbon-like structure.

BRAND MARK

The X is the standalone brand mark.

- Use for favicon, app icon, avatar and compact UI
- Never redraw or simplify the internal ribbon structure
- Keep generous space around the mark

TAGLINE LOCKUP

ProcureX

Where Industry Connects.

Use the tagline as supporting copy, not as a permanent part of every logo placement.

Clear space & minimum size

Give the wordmark room to breathe. The clear-space unit is based on the height of the X central crossing.

MINIMUM DIGITAL SIZES

- Full wordmark: 120 px wide minimum
- X mark: 24 px minimum in UI
- Favicon: use icon-only artwork
- Do not place the full wordmark inside tiny controls

SAFE AREA

Keep at least 1X clear space on all sides. Increase this in hero layouts and marketing material.

RULE OF THUMB

If the X starts competing with nearby text, icons or borders, the logo is too close. Give the identity more negative space rather than shrinking it into clutter.

Logo use: do / don't

Consistency creates recognition. Treat the X artwork as a fixed asset.

DO

- Use black Procure + blue X on light backgrounds
- Use white Procure + blue X on dark backgrounds
- Use the blue X alone for compact brand moments
- Maintain clear space and original proportions
- Prefer simple, high-contrast backgrounds

DON'T

- Do not recolor the X to arbitrary brand accents
- Do not stretch, rotate or skew the wordmark
- Do not add shadows, outlines or glows to the logo
- Do not place the logo over visually noisy imagery
- Do not type a substitute X using a font character

X mark: favicon & app icon

The X is ProcureX compact recognition asset. It should remain visually dominant and legible at small sizes.

RECOMMENDED EXPORTS

512 px App store / PWA

192 px Android / PWA

180 px Apple touch

64 px High-DPI favicon

32 px Browser favicon

16 px Fallback favicon

BACKGROUND OPTIONS

Light

Dark

Soft blue

Keep the icon centered. Avoid adding text inside the app tile. For very small favicons, prioritize the silhouette over decorative detail.

Primary color palette

ProcureX uses disciplined industrial neutrals with a high-energy blue spectrum derived from the X.

Dark sections, navigation, premium surfaces

Primary actions, links, active states

Highlights, gradients, data accents

Primary text on light backgrounds

Surfaces, reverse logo, breathing space

Page background and low-emphasis zones

Supporting colors & usage ratios

Use functional colors sparingly. Blue remains the unmistakable interaction color.

RECOMMENDED PAGE BALANCE

Accessibility rule: body text must maintain strong contrast. Use white on ProcureX Navy, Industrial Ink on white/cloud, and reserve bright cyan for emphasis rather than long-form text.

Typography

Roboto is the practical reference typeface for this book. In the website, use Inter or a comparable clean sans-serif across interface and marketing surfaces.

DISPLAY

Procure with confidence.

Bold / display weight

Use for hero headlines, page titles and major campaign statements.

INTERFACE & BODY

Supplier quotation received

Delivery: 30 days • Warranty: 12 months

Regular / Medium / Bold

Use regular for body copy, medium for controls and bold for labels or key values.

TYPE SCALE

Hero	40/44	Bold
H1	30/36	Bold
H2	24/30	Bold
H3	18/24	Medium

Body L	16/24	Regular
Body	14/21	Regular
Small	12/18	Regular
Label	11/16	Medium

Website UI language

The interface should feel precise and calm. Industrial data can be dense; the visual system creates order through spacing, surfaces and hierarchy.

SPACING SYSTEM

Use an 8 px base grid. Dense procurement screens may use 4 px micro-spacing inside compact controls, but page-level spacing should remain generous.

Buttons, fields & status language

Actions must be unmistakable. Use one strong primary action per decision point.

BUTTONS

FORM FIELD

What are you looking for?
e.g. 500 L SS316 mixing vessel

STATUS TAGS

INTERACTION RULES

- Primary blue = proceed, submit, request, confirm
- Secondary = inspect, compare, preview, save
- Destructive actions use red and require confirmation
- Do not use more than one visually dominant CTA in the same card
- Status colors communicate state; they should not be decorative

Core marketplace components

These patterns should become recognizable ProcureX building blocks across buyer, supplier and admin experiences.

SUPPLIER MINI-SITE

A supplier should feel they own a digital showroom.

A buyer should still feel they are inside ProcureX.

Company overview

Products & machinery

Certificates

Projects

Reviews

RFQ / contact

Photography & imagery

Show real industry with human context. The brand should feel credible, capable and contemporary.

PEOPLE + PROCESS

Procurement, engineering and operations teams in real work contexts.

MACHINERY

Clean, well-lit equipment photography with technical detail.

FACILITIES

Manufacturing environments that look organized and credible.

DETAIL

Close-ups of controls, finishes, labels, connections and components.

AVOID

- Generic handshake stock photos
- Overly dark factory shots with no focal point
- Artificial futuristic imagery that weakens industrial credibility
- Busy collages behind the ProcureX wordmark

Iconography & data visualization

Icons should simplify complex workflows. Data visuals should prioritize comparison over decoration.

ICON STYLE

DATA VISUALS

RULES

- Use simple stroke icons with consistent visual weight
- Favor blue for active / interactive icons
- Use status colors only where meaning is explicit
- Avoid 3D icons inside the product UI; reserve the 3D X for branding
- Charts should answer a procurement question quickly

Voice & tone

ProcureX should sound like a capable procurement partner: concise, specific and useful.

CLEAR

Say what happens next.

Post your requirement. Receive quotations from matched suppliers.

CREDIBLE

Use evidence and concrete language.

Verified supplier • 94% response rate • 12 years in business

ACTIONABLE

Lead with the user task.

Compare quotes / Request inspection / Contact shortlisted supplier

HUMAN

Use plain B2B language.

Need help specifying the machine? We can structure the RFQ for you.

Messaging hierarchy

Use a short brand line for memory, then explain the actual product benefit in direct language.

MASTER TAGLINE

Where Industry Connects.

Short, broad and scalable across industries and geographies.

BUYER

Post one requirement. Compare quotations from suitable suppliers.

SUPPLIER

Get discovered by industrial buyers actively looking for what you sell.

MACHINERY

List used industrial equipment with technical details, verification and inspection options.

PLATFORM

Discover suppliers. Post RFQs. Compare quotes. Source with confidence.

Marketing & social applications

Marketing should look like the product: structured, specific and useful.

LINKEDIN / SOCIAL

Pattern

One message + one data point + one clear CTA.

EMAIL

Pattern

Branded header, useful subject, compact requirement summary.

EVENT / BOOTH

Pattern

Large X, minimal copy, clear QR-driven action.

CONSISTENCY TEST

If a marketing asset could belong to any generic B2B marketplace after removing the logo, it needs more ProcureX structure: industrial relevance, verified data, strong blue action cues and concise sourcing language.

Brand governance checklist

A simple checklist keeps the identity consistent as more designers, developers and suppliers contribute content.

BEFORE PUBLISHING

- Correct light or dark logo variant is used
- X artwork has not been redrawn, recolored or distorted
- Primary CTA uses ProcureX Blue
- Typography uses the approved sans-serif system
- Body copy is concise and procurement-oriented
- Photography looks credible and industrial
- Status colors communicate an actual state
- Page preserves clear space and calm hierarchy
- Supplier contact controls follow marketplace policy
- Mobile layout remains legible at small sizes

ASSET NAMING

procurex-logo-primary.png

procurex-logo-reversed.png

procurex-x-mark.png

procurex-favicon-32.png

procurex-app-icon-512.png

OWNERSHIP RULE

Maintain one approved asset library. Product teams should reference the same files rather than exporting their own logo variants.
